

October 12, 1950.

Dear Vernon:

Under separate covers, I am sending a) whatever reprints I have left, and
b) two K-12 derivatives: 58-161 [B-~~L~~]; W-1177 [T-L-B₁- Lac- Gal- Xyl- Mtl- Gal⁺
Ara⁺ V₁^r S^r]. I am sure I don't know what you mean by "ornery"; these stocks
are well tagged; cross well; and are probably the same or very close to those
used by Cavalli, Newcombe, etc.

Speaking of reprints, would you send me yours?

Sincerely,

Joshua Lederberg,
Associate Professor of Genetics
